GitHub: <https://github.com/saMreact1> LinkedIn: <http://linkedin.com/in/samreact1>

PROFESSIONAL SUMMARY

Frontend developer with hands-on experience building scalable web applications using Angular, TypeScript, and modern JavaScript frameworks. Proven track record of developing responsive user interfaces, integrating REST APIs, and deploying full-stack solutions. Experienced in Agile development environments and cross-functional team collaboration, consistently delivering production-ready code that improves user experience and business metrics.

TECHNICAL SKILLS

Frontend Technologies: Angular, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, Angular Material, PrimeNG, Responsive Design, Single Page Applications (SPA).

Backend Technologies: Node.js, Express.js, MongoDB, Mongoose, Java, Spring Boot, Spring Security, REST APIs.

Development Tools: Git, GitHub, Netlify, Render, Docker, Cloudflare Tunnels, Postman, VS Code.

Methodologies & Practices: Agile/Scrum, JWT Authentication, Role-Based Access Control, UI/UX Implementation, Code Review, API Integration, Cross-Browser Compatibility.

PROFESSIONAL EXPERIENCE

DigiConsultants | Junior Software Developer

September 2025 - Present

- Designed and developed dynamic Angular components used across multiple client projects, improving development efficiency by 40%.
- Collaborated in agile sprint planning and participated in code reviews to ensure maintainable and scalable frontend architecture.
- Integrated REST APIs for real-time data synchronization, enhancing overall user experience and application performance.
- Implemented responsive design patterns ensuring cross-device compatibility and accessibility standards.

Blueraft Energy & Marine Services Ltd | Intern

March 2025 – May 2025

- Spearheaded the development of a full-stack task management app, reducing task oversight by 70% for internal teams.
- Built modern user interface using Angular Material with custom theme configuration and reusable animated components.
- Developed secure REST APIs and implemented role-based access control system, significantly increasing application security.
- Collaborated with cross-functional teams to gather requirements and deliver solutions aligned with business objectives.

Costaff AI | Freelance Frontend Developer

August 2024 – September 2024

- Implemented responsive and accessible design practices, improving user retention on mobile by 25%.
- Contributed to successful launch of AI-powered email and calendar web application, increasing demo sign-ups by 40%.
- Translated Figma designs into performant Angular components within agile development framework, accelerating feature delivery.

Olohie Virtual | Freelance Frontend Developer

June 2024 – August 2024

- Co-developed the Blog and Services pages with a Senior Frontend Engineer, enhancing site engagement by 30%.
- Delivered scalable and maintainable Angular code, resulting in 50% decrease in bug reports from quality assurance testing.
- Ensured seamless cross-device compatibility through responsive CSS and flexible grid systems.

PROJECTS

EventParcel | Full-Stack Developer (Personal Project)

June 2026 – Present

Technologies: Angular, Spring Boot, Spring Security, PrimeNG, Cloudflare Tunnels.

- Independently designing and building a full-stack event management platform aimed at giving organizers a single place to create events, manage attendees, and coordinate logistics without juggling spreadsheets and manual outreach.
- Owning both the Angular frontend and Spring Boot backend end-to-end, from architecture through deployment, to keep the organizer and attendee experience consistent across the app.

- Designed a dynamic Spring Security CORS configuration supporting wildcard Cloudflare tunnel domains, enabling secure live demos for prospective users and testers ahead of public launch.
- Upgraded and stabilized the UI component library by resolving PrimeNG/Angular peer dependency conflicts, keeping the interface current so early users get a smooth, modern experience.

SkooLLy App | Frontend Developer (Personal Project)

March 2026

Technologies: Angular, Spring Boot, Docker, Netlify.

- Building the Angular frontend for SkooLLy, an education-focused task management app designed to help students and tutors track assignments and deadlines in one place, and shipping it to a live Netlify deployment for testing.
- Unblocked production deployment by diagnosing and fixing recurring Netlify build failures, resolving Angular peer dependency mismatches and misconfigured publish directory paths.
- Containerized the Spring Boot backend with Docker and docker-compose, standardizing the local environment so the app runs reliably as it moves toward supporting real students and tutors.

GFAMM Web Platform | Frontend Developer

September 2025

Technologies: Angular, TypeScript, REST APIs.

- Built the complete frontend interface for GFAMM web platform using Angular, with responsive and accessible design across devices.
- Collaborated closely with Java backend developer to integrate APIs for dynamic content rendering and data flow.
- Optimized UI performance and ensured a smooth user experience across multiple devices and browsers.
- Deployed frontend application on Netlify for fast and reliable hosting with continuous integration.

My Manager | Task Management Application

March 2025 – May 2025

Technologies: Angular, Node.js (Express), JWT, MongoDB, Angular Material.

- Engineered robust task manager for multi-user environments with secure authentication and admin controls.
- Integrated custom themes and animated UX components, significantly increasing visual appeal and usability.
- Scaled backend APIs to handle user roles and task filtering, resulting in faster data queries and improved performance.
- Configured build and deployment pipelines for Netlify and Render, reducing deployment friction by 90%.

Workwise (EDTECH Application) | Volunteer Frontend Developer

August 2023 – December 2024

Technologies: HTML, CSS, JavaScript, Bootstrap.

- Rebuilt and redesigned the user dashboard, resulting in a 60% improvement in task completion rates.
- Independently developed a new homepage focused on clarity, ease-of-use, and mobile-first design principles.
- Collaborated with cross-functional teams to align user interface with business goals and back-end requirements.
- Enhanced user experience through pixel-perfect design implementation and feedback-based iteration.

EDUCATION

Federal Polytechnic Offa, Kwara State January 2020 – December 2022

Higher National Diploma (Mass Communication) — Upper Credit

Kwara State Polytechnic, Ilorin, Kwara State October 2016 – September 2019

National Diploma (Mass Communication) — Upper Credit

CERTIFICATIONS

- HTML, CSS, and JavaScript for Web Developers — Certificate, May 2025
- Angular Fundamentals: Building Responsive Web Apps — Certificate, May 2025
- Developing Websites and Front-Ends with Bootstrap — Certificate, January 2024
